### Access

The length of the circular Ingleton Waterfalls Trail is four and a half miles (8km), so you should allow between two and a half and four hours to complete, depending on your fitness levels and whether you are walking or strolling.

The trail follows a well-defined footpath over moderately inclined ground and a large number of steps are provided wherever there is a climb. Unfortunately, the footpath is therefore unsuitable for wheelchairs and pushchairs.

### Your Safety

The trail is strenuous and passes through areas that are dangerous if you leave the path. For your own safety, please take extra care, especially on the steeper inclines and during wet weather when the paths may be slippery. Please read and follow all the warning signs along the trail.

Suitable clothing and footwear is recommended for all visitors, including walking boots or strong shoes with good grip. Children need to be supervised at all times.

### Facilities

- Ample FREE visitor car parking
- Falls Café & Gift Shop at the entrance
- Falls Refreshment Centre halfway along the trail at Beezley Farm
- Picnic Areas
- Toilets at the start/end of the trail

### Dogs

We welcome dogs on the trail, but they must be kept on a lead in certain areas, particularly when crossing farmland. Dogs are the responsibility of their owners who must also clean up after them.

### Opening Times

The trail is open seven days a week, all year round, except Christmas Day, from 9.00 a.m. until dusk.

## a walk in a waterfall wonderland

The four and a half mile Ingleton Waterfalls Trail boasts some of the most spectacular waterfall and oak woodland scenery in the UK, truly encapsulating nature at its best.

As a year-round attraction, you will have abundant opportunities to view seasonal landscapes and to experience a walk in a waterfall wonderland, whatever the weather.

Ingleton Waterfalls Trail has something for everyone. It's an ideal day out amongst unspoilt surroundings for family and friends, and an opportunity for educational visitors to explore nature and geological features including Thornton Force that falls 14 metres over limestone.

With rare and interesting plants and wildlife and its importance as a geological site, much of the Ingleton Waterfalls Trail has been designated as a Site of Special Scientific Interest (SSSI) by Natural England.
